

Pentadecor® 3D laminate film with Gloss Line surface

Gloss Line features the highest degree of brilliance and resolution with an extremely smooth surface finish. Vivid solid colors and electric wood grains, transforms the most basic of designs into an eye-popping work-of-art. Gloss Line provides the ability to seamlessly form to: the most complex of contoured edges, serpentine shapes, and raised panel doors with incredible radiance. Ideally suited for most vertical and decorative horizontal applications.

As with all 3D laminates from Klöckner Pentaplast and SSI, Gloss Line is made from the highest quality materials. Gloss Line is 100% rigid film and is free of plasticizers and phthalates.

Stocked Gloss Line material is available in full or cut to length rolls with same day shipping. Custom designs and color matching is available in a timely fashion with the highest degree of accuracy. Either way, the minimums are low, cost is competitive, performance is exceptional.
