

ProGrip

(Printable Top, Tacky Bottom Film—Film #3, Surface P)

ProGrip is a co-extruded film with a printable surface on one side and a tacky surface on the other side. It is an ideal backing material for use in the construction of mouse pads, counter mats, and placemats. ProGrip is often laminated to American Profol's ProTuff over-laminate film for these applications. Printing can be done on either the ProGrip or ProTuff material prior to lamination.

Applications:

- Mouse pads
- Countermats and placemats
- Coasters

Advantages:

- Printable on one side, tacky on the other side
- Lower cost than rubber or foam rubber backing materials
- Light weight reduces postage costs of promotional items
- Thin material allows for low-profile mouse pad and counter mat construction
- Does not smell or outgas like chemical coatings
- Easy to clean using soap and water - remains tacky after cleaning
- Does not absorb food, beverages, or cleaning chemicals from counters
- Co-extruded construction will not delaminate.

Specifications:

- Printable on one side, tacky on the other side
- Corona treated on the printable side
- Standard color scheme is white on the printable side and black on the tacky side. Also available in all black, all clear, and white (printable side) and clear (tacky side) color schemes.
- Available 4 mil, 6 mil, and 8 mil thick
- Standard web width: 69" to 75" wide web
(Material can be slit in-line to custom roll widths.)
