

Pentadecor® 3D Laminate Film with Gloss Line Surface Care & Cleaning Guidelines

Pentadecor® 3DL Gloss Line surface set themselves apart by their high degree of brilliance and resolution with an extremely smooth surface finish. The following care instructions have been developed to ensure that these characteristics are maintained long-term.

Surface Sealing

For cleaning and increasing the scratch-resistance, sealing the surface with a suitable product, e.g. with **ULTRA GLOSS SUPERPOLISH + DGS®** is recommended at an early stage. This surface sealant can be applied immediately after the removal of the protective film as per the manufacturer's instructions. The sealant is also suitable for removing any residue from the protective film.

The product is concentrated and should be applied to the surface sparingly and evenly (using light pressure) with a special foam sponge. Any excess polish should be removed immediately with a clean cotton or microfiber cloth in vertical movements.

In order to maintain a long-lasting surface protection, the sealant should be reapplied after 12 months. Contact SSI North America for more information on **ULTRA GLOSS SUPERPOLISH + DGS®**.

General Cleaning

A clean cotton or microfiber cloth saturated with a mixture of warm water (99%) and a mild, nonabrasive dish washing detergent (1%) can be used to clean 3D laminate by wiping in vertical movements with light pressure.

Household Products:

Approved Cleaning Agents: Windex®, Clorox® Bleach (diluted mixture of water (90%) and bleach (10%) is suggested), Simple Green®, Formula 409®, and Fantastic® antibacterial with Lemon Power®

*Always read and follow the directions specified on the label of agent packaging.
(Mixing agents is not suggested)

Cleaning agents \ detergents should not contain:

Aromatic hydrocarbons, ester, ketones, halogenated hydrocarbons or alcohol above 25%. Vinegar-based detergents should not be used.

- No solvents (e.g. Paint thinners, turpentine, etc.)
- No denatured alcohols (e.g. White spirit, etc.)
- No abrasive detergents (e.g. Baking soda etc.)
- No cleaner in combination with a brush or scrubbing
- No furniture polish
- Use of brushes and scouring pads is not suggested
