

General Information & Applications

Pentadecor® kpExtreme™ 3D laminate film with Topline surface

Featuring a horizontal grade top coating that delivers excellent scratch, mar, chemical, and stain resistance.

kpExtreme™ provides the ability to seamlessly form to: wire management holes, contoured edges, serpentine shapes, and raised panel doors with increased durability and performance. Ideally suited for environments that are under high traffic and constant use.

As with all 3D laminates from Klöckner Pentaplast and SSI, kpExtreme™ is made from the highest quality materials. Film is free of plasticizers and phthalates.

Stocked kpExtreme™ material available in full or cut-to-length rolls. Select from stocked or non stocked, standard, and custom 3D laminate designs. Either way, the minimums are low, cost is competitive, performance is exceptional.

kpExtreme™ Solids

Produced with integral color and greater thickness for superior performance in high wear \ high traffic applications.

- Overall thickness: .022" / 550 micron
- Width: 56" / 1420mm
- Stocked roll length - 100lm

kpExtreme™ Prints

Produced with integral color and greater thickness for superior performance in high wear \ high traffic applications.

- Overall thickness: .018" / 450 micron
- Width: 56" / 1420mm
- Roll length - 100lm

Applications

kpExtreme™ is a 3-dimensional, horizontal-grade laminate that can be applied by flat lamination, membrane pressing, and vacuum forming.

Best suited for the following applications:

- Fixture & display
- Desk / table tops
- Wainscoting & molding
- Conference tables
- Medical furniture & components
- Commercial & residential cabinetry
