

## Radiance 1D & 2D General Info & Applications

### Radiance PET Laminate 1D & 2D Functionality

Radiance 2D PET High Gloss Laminate is an economical .300mm thick high gloss laminate with fantastic depth of color and a mirror like finish.

2D Radiance is designed for flat lamination, profile wrapping and miter folding. It is ideally suited for kitchen cabinet, store fixture, and architectural mill-work applications.

Radiance 1D PET Laminate is also an economical .300mm thick laminate with depth of color coated with a Super Scratch Resistant (SSR) coating providing a higher scratch resistance and durable finish. Available in both super matte and high gloss finishes.

1D Radiance is designed strictly for flat lamination. Perfectly suited for kitchen cabinet, store fixture, light duty horizontal and architectural mill-work applications.

All Radiance is made from the highest quality raw materials that are free of plasticizers and phthalates. Radiance 2D PET High Gloss Laminate features integral color, high impact resistance and excellent UV stability.

### Product Description

2D Polyester high gloss laminate with peel coat

1D Polyester super matte & high gloss laminate with peel coat

Gauge: .300mm

Width: 1270mm (1240mm usable)

Roll length: 460 lineal meters

Gloss level: 91 (±2) at 60 degree angle Top coat: Yes

Primer: No

Miter Foldable & Profile Wrapable: Yes

Gauge: .300mm

Width: 1270mm (1240mm usable)

Roll length: 460 lineal meters

Gloss level: High Gloss, 91 (±3) / Super Matte, 5 (±2) Top coat: Yes

Primer: No
