

Laminated StyleLite® Stocking Panel Program

StyleLite laminated panels are the ultimate high gloss finish for interior vertical surface applications. StyleLite laminated panels provide a perfectly flat mirror like finish with a gloss, depth of reflection and brilliance that are perfect for both commercial and residential projects.

The laminated panels are produced using a World Class hot melt PUR laminated system. This sophisticated lamination process creates a finished panel with a ripple free surface finish, excellent adhesion and outstanding heat and moisture resistance.

StyleLite laminated panels feature a 1mm thick StyleLite material on both sides.

Laminated StyleLite panels and matching edge banding are available from Randolph NJ stock for quick shipment. Designing and fabricating industry leading high gloss mill-work has never been easier.

Superior Features

- Ultra high gloss ripple free surface
- UV and color fade protected
- Won't chip, crack or delaminate
- Simple care, cleaning & repairability
- Economical and easy to fabricate

Applications

- Kitchen Cabinets & Doors
- Architectural Mill-work
