HIGH QUALITY MIRROR PANELS

StyleLite Mirror is a pristinely flat laminate sheet with perfect reflective properties. Visually stunning, it is ideally suited for almost any high-profile area in commercial or residential, indoor environments; closet doors, retail store fixtures, wall panels for gyms, swimming complexes to name a few. StyleLite Mirror is the perfect alternative to glass mirror applications and is becoming the preferred choice for designers, fabricators and property owners for the following reasons:

- Easy to work with. Sheets can be cut, drilled and planed with standard woodworking tools, on the job site or in the shop
- StyleLite Mirror is heat bendable to produce beautiful seamless edges
- The surface is easy to clean using standard glass and polymer cleaners such as Windex & VuPlex
- Light to moderate scratches can be buffed out
- StyleLite Mirror is very safe as it will not shatter
- The lightweight characteristic of Mirror reduces installation manpower and time

Raw Acrylic Sheet Size

2mm x 4'x8' (1220 x 2440mm)

Edge using any StyleLite preprimed or heat activated edge band
